

EZ-Lift is a deluxe, 2-tier bike rack that stores twice as many bikes as ordinary bike racks. To facilitate use, the upper level tracks are cantilevered and incorporate a piston that assists in raising and lowering bikes. Additionally, the upper tracks pull downward, creating a ramp for easy loading. Each track incorporates a solid steel lock bar for extra security.

2-Tier Bike Rack: High density

- Two tiers double capacity
- Piston-assist ramp for easy loading and unloading
- Heavy-duty construction w/solid steel lock bars
- Ideal for bike rooms

EZ-8
