

Mod-U-Grid uses standard size, welded wire mesh, to quickly transform a storage room, parking area and many other locations into secure bike enclosures. Mod-U-Grids range in width from 1' to 10' (in 1' increments) and can be configured into multi-sided enclosures secured with a locking door. The flexibility of this modular system enables you to create freestanding enclosures or enclose nooks, corners and dead spaces...without the cost of customization.

- Heavy-duty, locking mesh enclosures for indoor use
- Ideal for bike rooms, parking garages, basements, dormitories, apartment and commercial buildings
- Can be configured in almost any size
- Flexible, modular system

Mod-U-Grid
